Outsourcing IT Projects and Staff, Nearshore

The advantages of outsourcing are well known to most industries that choose this as the best option for providing constant quality support and cost reduction. We can provide you with an outsourcing nearshore solution with cultural sensitivity, parallel time zone, instant accessibility to work force, and eliminating language barriers. Our recruitment process for IT professionals with strict standards, allows us to deliver our customers the technical skills needed for development of their projects, such as:

Software Development Analysts,
Test Managers and Test Analysts,
Certified Scrum Master,
Platform Administration,
Application and Technical Support (Help Desk),
Among others.

Software Quality Assurance, Testing

This service comprises a set of functional and non-functional tests to ensure the quality of an application using agile methodologies, support tools and best practices of software engineering. The functional test ensures adequate project requirements, navigation, data entry, processing and delivery, among others.

Manual & Automated Functional Testing
Non-Functional Testing (Performance, Stress and Profiling)
Database Governance and Quality

Differential Values

Official SEI evaluation, CMMI level 3 for SW Development
Pioneers in CMMI level 3 for Testing, Official SEI evaluation
ISO 9001:2008
Extensive knowledge in automated functional testing
Continuous improvement through EPG (Engineering Process Group)
Specialized research and development team
